Karissa LeClair Cortéz, MD, MPH

In addition to physical inspection and onsite interviews, reviews of patient records and NaphCare Policy and Procedure manuals were conducted electronically.

A concomitant onsite Environmental Health inspection was conducted by the following:

Santa Cruz County Health Services Agency, Environmental Health Division

A concomitant onsite Nutritional Health inspection was conducted by the following:
Caren Dix, RDN, Nutrition Consultant.

These reports are attached.

Overall, Title 15 inspections in 2025 show the facility to be well maintained and clean, with dedicated Health and Custody staff who work together to care for the inmates.

There were no deficiencies identified in any of the Medical and Mental Health, Environmental Health or Nutritional Health inspections and I concur with the findings. In addition, I recommend that quality assurance and improvement processes continue to be reported on a quarterly basis to the multidisciplinary quality assurance group, with a specific request to initiate a QI project to study the timeliness to incarcerated persons' nonemergency medical and mental health service requests.

I want to commend Sheriff Clark and the Corrections team for an excellent inspection. They deserve recognition for the quality of care they provide to individuals in custody. Their effective collaboration with NaphCare and Public Health reflects a strong commitment to supporting the health and well-being of the incarcerated population.

Please contact me with concerns or questions.

Sincerely,

Lisa B. Hernandez, MD, MPH

Summary of medical/mental health evaluation:

The Roundtree Facility is for minimum security inmates and is in an unincorporated area of Southern Santa Cruz County. On the day of the inspection, June 5, 2025, the Roundtree Facility census was 60. Both units, "R" and "S" are operational. The facility is well maintained and clean. Health and custody staff exhibited teamwork and a common philosophy for the care of the inmates in their custody.

The medical clinic provides 24/7 nursing coverage, an RN 0700-1900 and a LVN 1900-0700. MD Fratianni is on site one day per week and is on call 24/7. Dental care is provided by the main jail's dental clinic. A mental health clinician is on site every Wednesday and as needed. Psychiatry coverage for the county's four-jail system includes a psychiatrist on duty eight hours and a psychiatric nurse practitioner on duty 40 hours per week. An EKG machine is available on site. Bio-reference is contracted for lab services and Cal Mobile provides X ray and ultrasound services.

Recommendation:
Medical and mental health requests: I highly recommend the QI committee establish meaningful data-driven QI via PDSA (plan-do-study-action) model to deliver health care to the incarcerated population. The inmates' nonemergency requests timeline for medical and mental health could be a QI study project. Currently, inmates submit requests via tablets (or paper) in a separate software system (Smart communication), which does not interface with *"Tech Care"* EMR. An audit, QI study would provide the county with an objective understanding.

The Santa Cruz County Roundtree Jail meets all applicable Title 15 Standards for Medical/Mental Health.

Summary of nutritional evaluation:

The Santa Cruz County Roundtree Facility contains a large main kitchen where meals are prepared for all four Santa Cruz County correction facilities. The meals are contracted through the Aramark corporation, which supplies its own staff to run the kitchen. Kristen Mitchell continues as the Food Service Manager with the Santa Cruz County Sheriff Corrections Department and is integral to helping communications between the Corrections Department and Aramark Food Service, ensuring all guidelines are met. The nutrition evaluation at the Rountree Adult Facility went well, the kitchen runs smoothly. The kitchen utilizes incarcerated persons from the Rehabilitation and Re-entry unit to work and support staff in the kitchen. Incarcerated persons are trained on food safety and can take classes to become food safety certified.

All Title 15 food safety protocols and regulations are met. The menus follow the current dietary guidelines for Americans and many of the meals are prepared from scratch. The updated menu includes fresh chicken and new recipes, which is great for variety and health and a welcome addition to the menus.
